

PASSION FOR QUALITY

Equipment for professionals – our philosophy

Schneider GmbH excels as an efficient and quality-conscious supplier and partner to culinary professionals.

When the company was founded by Helga and Hans Schneider back in 1977, the range of goods consisted only of a small specialised selection of products, for the baking industry.

From the beginning the initial focus was on the double sided, siliconised baking paper, a yet unfamiliar quality, and at that time only offered on the German market.

Based on entrepreneurial vision the core business has meanwhile been enhanced by pastry bags and a variety of small devices, made of metal and plastic. Today approximately 4000 items are available across the world for professional chefs, bakers, caterers, pastry chefs, chocolatiers, and confectioners.
